IBSSP Stock Market Star Rating System for Evaluating Individual Stocks

Publisher: IBSSP | www.ibssp.com
Date of Disclosure: April 28, 2025

Introduction:

Legacy is more than wealth, legacy is forged through wise decisions, and a commitment to enduring quality. A structured star rating system helps identify stocks with the fundamentals to thrive over time, leaving behind a legacy of resilience and prosperity.

Abstract:

The IBSSP Stock Market Star Rating System is designed to evaluate individual stocks based on predefined criteria, by summarizing complex financial and market data into an intuitive, easy-to-understand rating format.

Description of the Concept:

The IBSSP Stock Market Star Rating System assigns a rating scale to individual stocks, reflecting an assessment of their overall market conditions. The rating is derived from a structured methodology that incorporates quantitative and/or qualitative factors, ensuring objectivity and consistency.
e.g.: ★★★★★; ★★★★☆; ★★★★; ★★★☆; ★★★; ★★☆; ★★; ★☆; ★; ☆

Key Features:

- Star-Based Rating Scale: each stock is assigned a rating based on a structured evaluation process.
- Objective Evaluation: the system applies predefined criteria to assess stocks, avoiding subjectivity.
- Dynamic Updates: ratings may be periodically adjusted as financial and economic conditions change.

Conclusion:

This disclosure serves to publicly document the existence of IBSSP Stock Market Star Rating System as of the date specified. By publishing this document, IBSSP ensures that the core concept remains publicly available.
